Of Minds and Language

Noam Chomsky
MIT

Keywords: biolinguistics, I-language, mind, minimalism

Abstract

This article reviews, and rethinks, a few leading themes of the biolinguistic program since its inception in the early 1950s, at each stage influenced by developments in the biological sciences. The following also discusses how the questions now entering the research agenda develop in a natural way from some of the earliest concerns of these inquiries.
Authors who publish with this journal agree to the following terms: Authors retain copyright and grant the journal right of first publication with the work simultaneously licensed under a Creative Commons CC-BY License that allows others to share the work with an acknowledgement of the work’s authorship and initial publication in this journal. Authors are able to enter into separate, additional contractual arrangements for the non-exclusive distribution of the journal’s published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgement of its initial publication in this journal. Authors are permitted and encouraged to post their work online (e.g., in institutional repositories or on their website) prior to and during the submission process, as it can lead to productive exchanges, as well as earlier and greater citation of published work (See The Effect of Open Access).
The phenomena of mind and language are currently studied by researchers in linguistics, philosophy, psychology, artificial intelligence, and cognitive anthropology. Mind & Language brings this work together in a genuinely interdisciplinary way. Along with original articles, the journal publishes forums, survey articles and reviews, enabling researchers to keep up-to-date with developments in related disciplines as well as their own.

Homepage. Join the conversation about this journal. The set of journals have been ranked according to their SJR and divided into four equal groups, four quartiles. Q1 (green) comprises the quarter of the journals with the highest values, Q2 (yellow) the second highest values, Q3 (orange) the third highest values and Q4 (red) the lowest values. Category. Year. Quartile. Language And Mind. Overview. Syllabus. Faculty. FAQs. Language And Mind. ENROLL NOW. Start Date 05/02/2018. Language learning can be put under three broad perspectives. Some believe language is pairing of lexicon and syntax i.e. of words and the set of rules that defines how we can combine those words most fundamental of these rules are innate i.e. they are already there in the human mind before it is exposed to society. This means there is perhaps an innate Language Faculty. Still others believe that General Cognitive Abilities that account for other kinds of learning can also account for language. There are many others who strongly believe that language is essentially socially embedded and that al
